## PROFILE

Experienced Software Engineer and hardworking individual with a passion for learning and a hunger for new challenges. Equipped with a diverse and promising skill set for seamless integration in any team, as well as being able to effectively self-manage during individual or single-person projects. Proficient in an assortment of languages and frameworks including React Native, React, Spring Boot, NodeJs, and Typescript.

---

## EMPLOYMENT HISTORY

Jul 2022 — May 2023

### Software Engineer, BairesDev LLC

Spanish town

Contracted to Levitate - Tasked with providing stability to their mobile app by identifying bugs, resolving identified bugs, and suggesting and making improvements to the mobile app.

- Completed all tasks and bug fixes during my tenure as sole mobile app developer until the project had to be put on pause.
- Configure Microsoft Visual Studio AppCenter to implement a continuous delivery service for completed mobile features to be tested.
- Completed three new features that were successfully deployed as updates.

Jun 2020 — Jul 2022

### Software Developer, Smart Mobile Solutions (Contracted to National Commercial Bank)

Kingston

#### Front-end Development

- Work interchangeably between the number one rated bank app in Jamaica as well as their stock investment app.
- Managed the deployment of new feature releases and major bug fixes to the app stores (Apple and Google).
- Assisted in helping maintain the code coverage to target 75% through merge request reviews and peer review sessions.

#### Back-end Development

- Work interchangeably on both middleware spring boot applications.
- Handled middleware tasks after transitioning to a team lead role.

Completed over 10 new features for both apps and a number of endpoints in the middleware.

May 2017 — May 2020

### Technical Support Specialist, Agile Business Solutions Limited

Kingston

- Provide support through telephone, remote or face-to-face sessions to help resolve clients' IT-related issues.
- Maintain and troubleshoot Microsoft Office 365 and Server 2012 Environments.
- Monitor and maintain computer systems and networks using several monitoring tools such as SolarWinds.
- Configure and mount various network equipment and install relevant OS images and firmware upgrades.
- Design, develop and maintain CMS websites.
